Discovery of Lost Sharks

Sept
7

Vicky Vásquez from Pacific Shark Research Center tells about her discovery of the Ninja Lantern shark as well as other Aliens of the Deep (as featured on Discovery Channel)

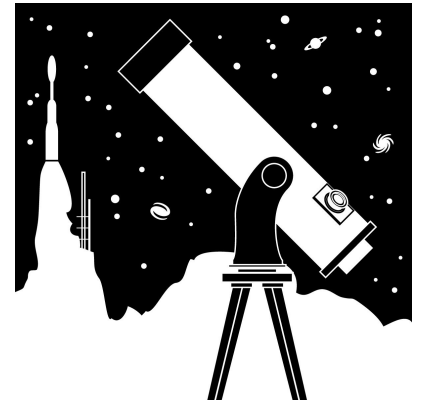

Ninja Lanternshark

Astronomical Photometry

Oct
12

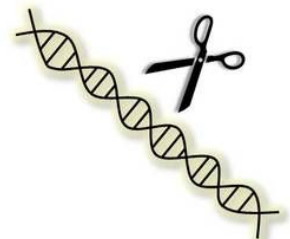

Steve Smith, President of the Robert Ferguson Observatory, discusses "Fundamentals of Photometry" (the study of light). How astronomers (and Piner students!) use light from celestial objects to learn about the Universe! The after cafe will be held in the SPARQ Observatory! Guaranteed to be enlightening!

The Virtues of CRISPR Technology

Nov
9

Harold Marin, UCSF will discuss how the discovery of a bacterial gene splicing mechanism has been used to advance molecular biology to perform a variety of gene editing experiments
