BIOTECHNOLOGY/HEALTH SERVICES

Piner High School

ALL INTERESTED STUDENTS ARE GUARANTEED PLACEMENT IN THIS PROGRAM!

The Biotechnology & Health Services Program is a three year program. The Emphasis for the first two years of the program is on gaining laboratory experience and general background knowledge in the areas of genetics and DNA analysis, human biology, the nature of disease, treatment strategies, environmental science, microbiology, anatomy & physiology and many other fields. Relevant guest speakers and field trips are included in these courses. The third year course provides an opportunity for students to pursue more individualized interests and career path opportunities. As part of this course, students will participate in advanced field work internships and job shadowing placements with professionals in the community. The third year course also allows students to fine tune their laboratory skills and techniques. In addition, students will practice for job interviews, contacting colleges, completing college applications, as well as communicating directly with professionals in the students' fields of interest. Students leave the program with current certificates in CPR, First Aide and Work Readiness.
